

## The *Tabling*

There is no ware wash installation without tabling.

The tabling is a must for large ware wash installations that we find at both the machines' inputs and outputs; the design therefore should not overlook the tabling for the sake of perfect ergonomics and smooth installation.

In both the hotel and the catering industries, the implementation of innovative solutions leads to optimize and to allow a reduced space to meet to the strictest hygienic criteria.

Our sheet metal facility produces both standard and customized models.

**Our realization speak for us.**
